Company history began in 2000 with a small point of sale of ice cream in one of the universities of Khabarovsk city, after a year of such work we decided to manufacture our own ice cream, because we wanted to provide the citizens of Khabarovsk, tasty and high quality product. Using exclusively Russian origin raw materials we achieve high quality of the final product, save all the useful properties of the natural products.

Using the natural and high-quality raw materials is the main principle of our work. That is why we are entering into a narrow range of client's factory producing the best milk in Russia.

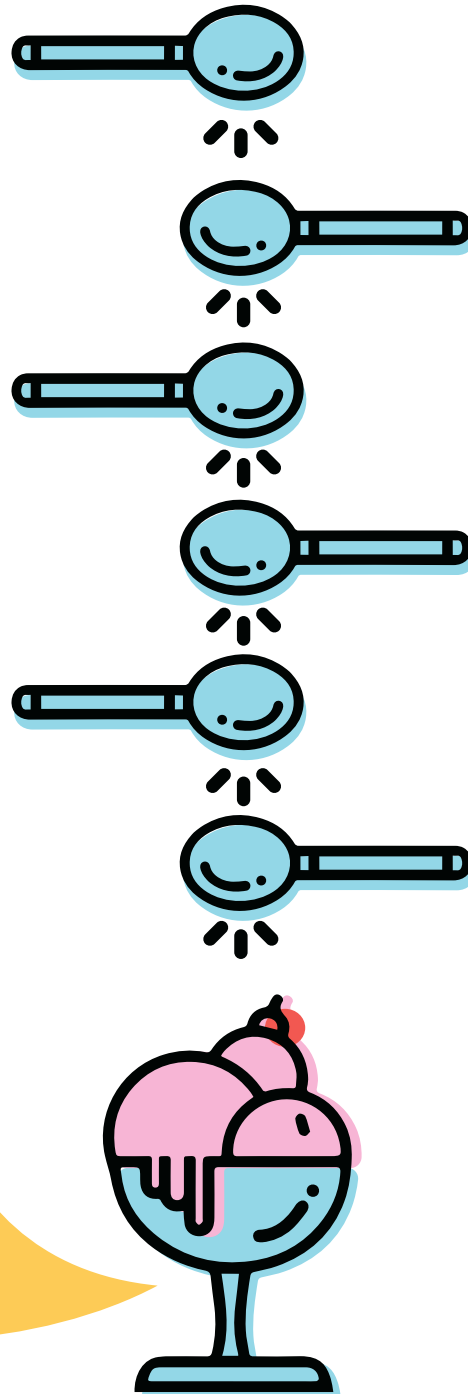

Also, we are pleased to support local Russian Far East manufacturers, so we use the Far East berries and nuts to filling our ice cream.
